

| COMPANY PROFILE FORM | |
|---|---|
| Name | Diamedica SA |
| Short profile | <p>Diamedica SA is Medical and Research Laboratory performing analysis of biological fluids for various biochemical substances. It's specialized in pregnancy and especially in biochemical prenatal screening of fetal abnormalities.</p> <p>Diamedica is equipped with many state of the art automated analyzers like:</p> <ol style="list-style-type: none"> 1. Barhms Kryptor 2. Roche Elecsys 3. Siemens DPC Immulite 4. Roche Integra 400 5. Diamedix MagoPlus (fully automated walk away microelisa analyzer). <p>And many support instruments: centrifuges, vortexes etc.</p> <p>It is fully computerized with LabTrak Laboratory Information System (LIS) and barcodes for the positive identification of the processed samples.</p> <p>It has installed a web reporting system for the fast and direct access of the results via internet by authorized clients (after secure identification).</p> |
| Research and Development Activity: | <ol style="list-style-type: none"> 1. Use of an in house developed software for first trimester screening of Down syndrome and other trisomies using PAPP-A, f-βHCG and ultrasound measurements 2. Evaluation of the software, comparing the results of screening with the outcome of the pregnancy 3. Evaluation and comparison of various methods of PappA and freeβHCG measurement 4. Development of a software that uses PLGF and sFLT1 measurements for the early screening of preeclampsia 5. Development of a software that uses Inhibin-A and Activin-A in the second trimester for the of preeclampsia 6. Evaluation of other biochemical markers for preeclampsia screening 7. Evaluation of NGal for assessing renal function in various conditions |
| Partner search with activity in the following research areas: | <ol style="list-style-type: none"> 1. Software development 2. Biochemical methods evaluation 3. New markers for various conditions in pregnancy |
