

COMPANY PROFILE FORM	
Name	INNOVISION SPIN OFF
Short profile	<p>InnoVision Spin-off LTD is a Greek start-up company (www.innovisionhealth.com) established under the auspices of the Institute of Biomedical Research & Technology, Centre for Research and Technology, Thessaly (www.biomed.ceretheth.gr). The company is specialized in the identification of novel autoantigens and biomarkers of human diseases and the development of enhanced performance immunoassays for the detection of humoral and cellular immune responses with diagnostic and prognostic significance. One of its main goals is to develop simple, single tests able to replace conventional immunoassays used for the detection of disease-specific antigens and biomarkers and monitoring of immunological reactivities as indexes of disease status, response to vaccines or therapeutical approaches (immune-mediated anti-cancer and anti-viral treatment).</p> <p>InnoVision's human resources encompass a multi-disciplinary group of academics and researchers with a special interest in molecular and cellular immunology strongly associated with an experienced project management team aiming at achieving an advance in science and technology and procuring customised Research and Development applications for its clients.</p>
Research and Development Activity:	<ol style="list-style-type: none"> 1. Development of antigenic cocktails for the simultaneous and robust detection of antibodies with diagnostic, clinical and prognostic significance 2. Development of customised assays for the measurement antigenic-specific cellular immune responses in chronic inflammatory diseases and in particular infectious, autoimmune and malignant disorders 3. Identification of novel immunobiomarkers
Partner search with activity in the following research areas:	<ol style="list-style-type: none"> 1. Immunodiagnostics 2. Translational Immunology 3. Immunomics
